

# Environmental Management Completed Projects 2005-Present

---

**EM** Environmental Management

safety ❖ performance ❖ cleanup ❖ closure

Before, during, and after pictures of the K-33 building decontamination, decommissioning, demolition, and disposal project at Oak Ridge's East Tennessee Technology Park.

In order to promote transparency with stakeholders and the public, the Office of Environmental Management (EM) is posting key project management information. This web page provides the list of completed EM cleanup projects from various sites across the country from 2005 to present, along with the each project's performance related to cost, schedule, and scope.

The EM cleanup projects address large quantities of radioactive wastes, spent nuclear fuel, excess plutonium and uranium, thousands of contaminated facilities, and contaminated soil and groundwater resulting from five decades of nuclear weapons production and energy research during the Cold War.

The EM cleanup projects fall into several categories including soil and water remediation, ground water remediation, solid waste stabilization and disposition, nuclear and non-nuclear decommissioning and demolition. In each of these cleanup categories, EM has to complete a series of individual projects at the various sites. The cleanup at a site is broken into multiple individual projects with a well-defined scope, schedule, and cost.

The table below shows the individual projects EM has completed in each category at each site. At many sites, additional projects are ongoing or will be needed in the future to finish the cleanup in each category.

The table highlights the projected costs, actual costs, projected completion dates, and actual completion dates. The EM projects were completed through November 30, 2012 with the following success metrics:

- 99 percent (79 of 80 projects) completed all scope defined at project start
- 91 percent (73 of 80 projects) completed on schedule
- 88 percent (70 of 80 projects) completed within 10 percent of project budget

## Environmental Management Completed Projects 2005-Present

Site	Category	Project Name	Notes	Approved Budget \$M	Actual Cost \$M	Approved Forecasted Completion (Calendar Year)	Actual Approval Date (Calendar Year)	Cost Success?	Schedule Success?	Completed Scope?
Argonne National Laboratory, IL	Soil and Water Remediation	Soil and Water Remediation ANLE-0030	a	\$ 28	\$ 30	2007	2007	Yes	Yes	Yes

## Environmental Management Completed Projects 2005-Present

Site	Category	Project Name	Notes	Approved Budget \$M	Actual Cost \$M	Approved Forecasted Completion (Calendar Year)	Actual Approval Date (Calendar Year)	Cost Success?	Schedule Success?	Completed Scope?
Sandia National Laboratory, NM	Soil and Water Remediation	Soil and Water Remediation VL-SN-0030	a, c	\$ 235	\$ 236	2009	2009	Yes	Yes	Yes
Separations Process Reactor Unit, NY	Soil and Water Remediation	Contaminated Soil Removal - North Field SPRU-0040.R1.2		\$ 15	\$ 13	2011	2011	Yes	Yes	Yes
West Valley Demonstration Project, NY	Nuclear Facility Decontamination and Decommissioning	Main Plant D&D WV-0040.C1		\$ 46	\$ 99	2011	2011	No	Yes	No
				<b>\$ 18,697</b>	<b>\$ 17,119</b>	<b>Total (of 80 Projects)</b>		<b>70</b>	<b>73</b>	<b>79</b>
						<b>% Success</b>		<b>88%</b>	<b>91%</b>	<b>99%</b>

(a) These projects were baselined at different times and under different guidance. The cost, schedule, and scope success is measured against values reported to Congress in July 2004 by the Department of Energy's Office of Management and Budget.

(b) Rocky Flats Closure Project cost, schedule, and scope success is measured against the 2001 Closure Baseline.

(c) Projects achieved Physical Completion in 2009. Formal Project Closeout (Critical Decision-4) documentation was completed in 2010.
